Shelf life: 1 year in a cool and dry environment. Temperature 10-25°C, Relative Humidity 50%
 Repack opened rolls when not in use.

Best results are obtained between 15-30°C and 30-60% RH.

No Material Safety Data Sheet required.

This film is suited for short term outdoor applications.

Canon develops high-quality colour profiles for media / ink / printer / RIP combinations. Check availability of profiles for your printer on www.canon-europe.com/mediaguide

Processing Guidelines

Printing guidelines

Allow material to adapt to room conditions for 24 hours before printing. It is recommended to handle the media with cotton gloves. Make sure that the media comes not into contact with grease, oil, silicon, and dirt to avoid printing defects. Insert the film with care in the printer. Incorrect loading can cause skewing or creasing. It is recommended to calibrate the printer before printing and to make a test print. Print results will vary for different printer ink combinations. Canon media profiles include recommended settings for ink restrictions and printer parameters. Depending on environment and application, printer parameters may have to be adjusted slightly in order to obtain the best results. For high-speed production printing, using an external drying unit is recommended.

Application guidelines

This film can be used outdoor without lamination. However, we recommend protecting its surface if it is subject to abrasion or any other mechanical influences. The film has very good lamination characteristics. Make sure that prints are completely dry and that all solvents are evaporated. It is recommended to let the prints dry at least 24 hours.
